

Biocalculus helps clinician to procure and analyse cardiac rhythm abnormalities outside the clinical environment. It offers an easy-to-wear sensor combined with proprietary algorithms that transform data from millions of heart beats into clinically actionable information. This biosensor, can be worn for as many days as advised by the clinicians. Also it will take the pressure off clinicians and patients while enhancing patient

- SINGLE CHANNEL EKG/ECG
- TRACKS DAILY ACTIVITY
- 3 DAY CONTINUOUS OPERATION
- 7 DAY ONBOARD MEMORY
- CLOUD ANALYTICS
- CLINICALLY ACTIONABLE REPORT

Continuous cardiac monitoring to masses
Every heart matters.... Every heart beat counts....

DETECTS

Normal Sinus Rhythm
Bradycardia
Tachycardia
Premature Atrial Contractions
Premature Ventricular Contraction
Ventricular Tachycardia
Atrial Fibrillation
Atrial Flutter
AV Block*

KEY BENEFITS

- Take care of Patient concerns during the monitoring period
 - Remote Monitoring ecosystem
 - 3 Level access rights
 - Physician dashboard enable absolute freedom for clinicians
 - Analyze by your own ECG Technician
 - Customized time frame based on patients symptoms
-
