

Experience
AI-Assisted
MCOT
Service
Ecosystem

Personalized Holter Monitoring for

Comprehensive Evaluation

Syncope (Fainting)
Atrial Fibrillation (AFib)
Palpitations
Dizziness or Lightheadedness
Neurological Symptoms

SIZE
80x28x11mm

EXTENDED CARDIAC RHYTHM MONITORING

Extended Memory
Benefit from Onboard Memory for up to 10 Days of Monitoring, Easily Extendable to 30 Days

Cloud AI Analytics
Seamless Cloud Connectivity with Smart phones and Cloud-Based Clinical Reporting Services

Tracks Daily Activity
Utilizes In-Built Accelerometer for Patient Activity Level Tracking

Long Battery
Enjoy up to 4 Days of Continuous Operation on a Single Charge

Flexible Time Frame
Easily extended as needed, No fixed Timing

Biocalculus Capture AF more quickly &
Reduce risk of second stroke

AF PATIENTS
ARE AT 5X GREATER
RISK FOR **STROKE**

Meticulously Crafted by
Certified Cardiac Technicians.
Our comprehensive
reports identify a wide
range of arrhythmia
irregularities, including
AF, SVT, VT, PAUSES, PVC, PAC, &
HEART BLOCKS

EMPOWER YOUR
HEART HEALTH
WITH AUTHENTICATED
END-OF-SERVICE
SUMMARY REPORTS

STREAMLINE NURSING WORKLOADS & SIMPLIFY DOCUMENTATION

REAL-TIME DATA VISUALIZATION & ABNORMALITY IDENTIFICATION

Inpatient Monitoring
Stroke Care
AF Ablation
TAVR Procedures and More.
